

Financial Advisor Bot

David Jackson

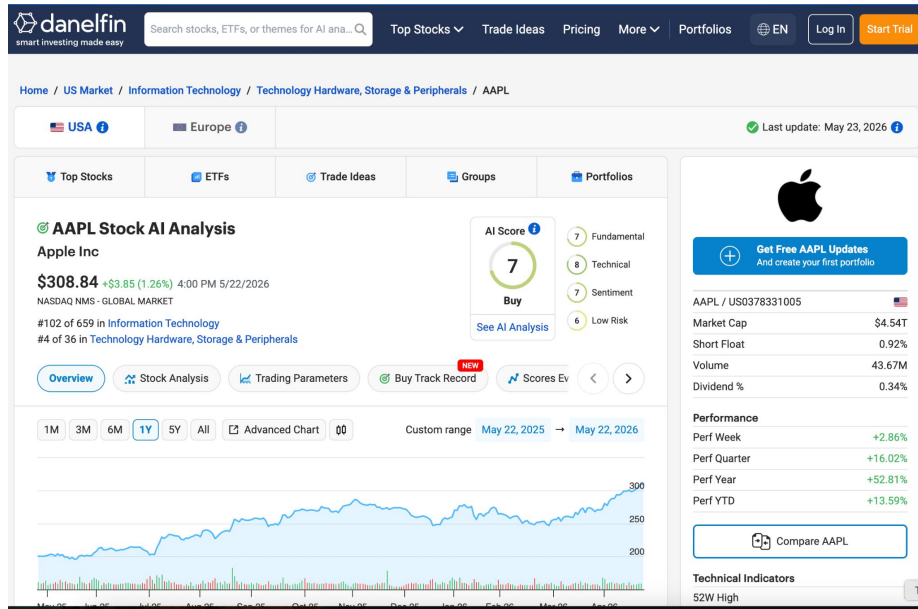

Danelfin.com

Features

- Stock price chart with time frame filters for 1 month, 3 months, 6 months, 1 year, 5 years, all time, or a custom date range.
- Current stock data including market cap, volume, dividends, 52-week high/low, and average volume.
- Simple stock rating out of 10 with a buy or sell recommendation.
- Sentiment input that considers what other analysts think about the stock.
- Pro version provides recommended stop-loss and take-profit points.
- Portfolios feature for managing owned stocks in the UI, including sell information when appropriate.

Missing Features

- Does not include news or press releases in the UI.
- No LLM chat feature; all displayed data must be interpreted from content already shown on the page.

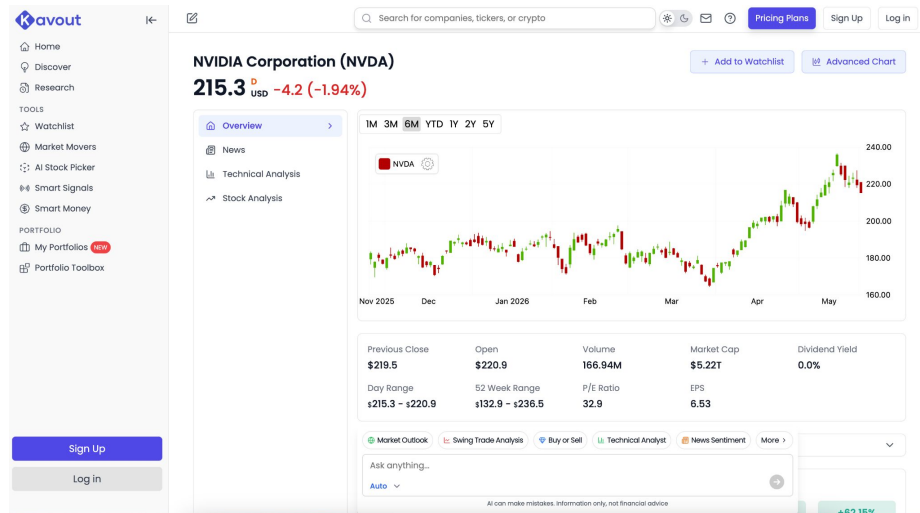

Kavout.com

Features

- Stock price chart with time frame filters for 1 month, 3 months, 6 months, 1 year, 2 years, 5 years, and all time.
- Stock-related news shown in the UI.
- Technical analysis based on multiple trading perspectives.
- Gauge-style charts showing recommendation levels: strong sell, sell, neutral, buy, and strong buy.

Missing Features:

- Brokerage connections are read-only, even though it supports 30+ brokerages.
- Does not allow users to place trades inside the app.
- Does not automatically execute trades for users.

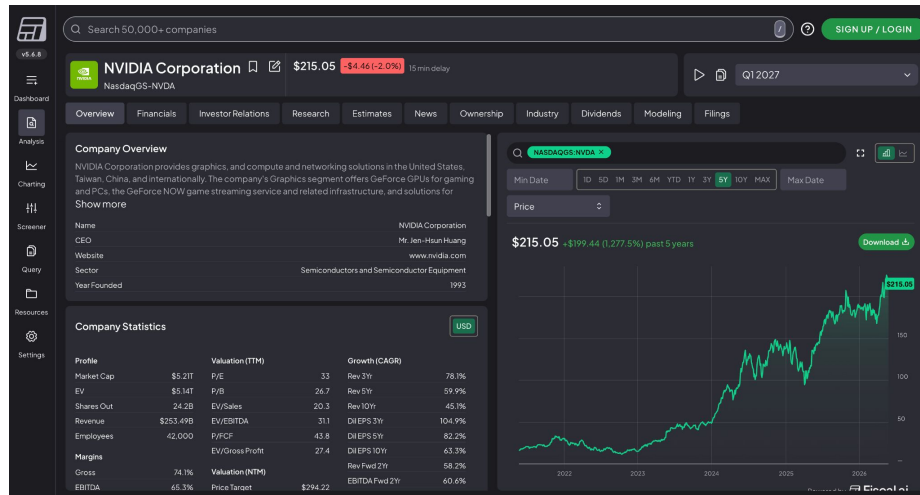

Fiscal.ai

Features

- Text description of the company, including the CEO name.
- Company statistics including number of employees and many other financial fields.
- Stock price chart with expected time frame filters.
- Ability to download chart data.
- Ability to choose metrics to compare on a chart.

Missing Features:

- Does not appear to provide a clear buy or sell recommendation for a stock.
- Does not appear to provide technical information about how its algorithms work.

Proposal

- Use two part AI modeling (LSTM, RL) for predictions
- Daily data updates using yfinance
- Use pretrained LLM model for chat based interactions with users
- Show charts and data about companies similar to other tools
- Ability to switch between light and dark mode
